

## Impact on the use of Oilmet 50 Plus in poultry feed

Methionine is an essential amino acid, and along with raw materials and a completely natural supplement, as **Oilmet 50 Plus**, they all fulfill the requirements in the different stages of animal production.

Along with Methionine, **Oilmet 50 Plus** acts as a synergic metabolic enhancer. As it is a fluid, it can be used in balanced feed plants.

**Oilmet 50 Plus** is manufactured and produced by **SL NATURAL SRL**, which counts on the technological support, the quality and certifications needed to add it in servings with the maximum safety and confidence.

Its Quality Standards show its nutrition facts, which make it a natural resource combining cost and benefits. Its formulation is highly beneficial in technical and economic terms.

Nowadays, the global tendency is oriented to natural products to replace synthetic and chemical ones.

It is important to highlight the bioavailability of all **Oilmet 50 Plus** components in the animal's metabolism.

As it is a fluid, it is easy to handle and store. The automation of dosage processes and the safety of its use in the mixing cycles have made **Oilmet 50 Plus** an ally of balanced feed plants, as it helps capturing feed's micro components.

# 1 What are the profits of using Olimet 50 Plus in comparison with Methionine 100%?

As net profit, the producer obtains a 50% reduction in the use of methionine, fulfilling the same requirements of such amino acid.

# 2 What does OM50P supplementation provide?

NATURAL CHOLINE **+** INOSITOL

# 3 How is it used?

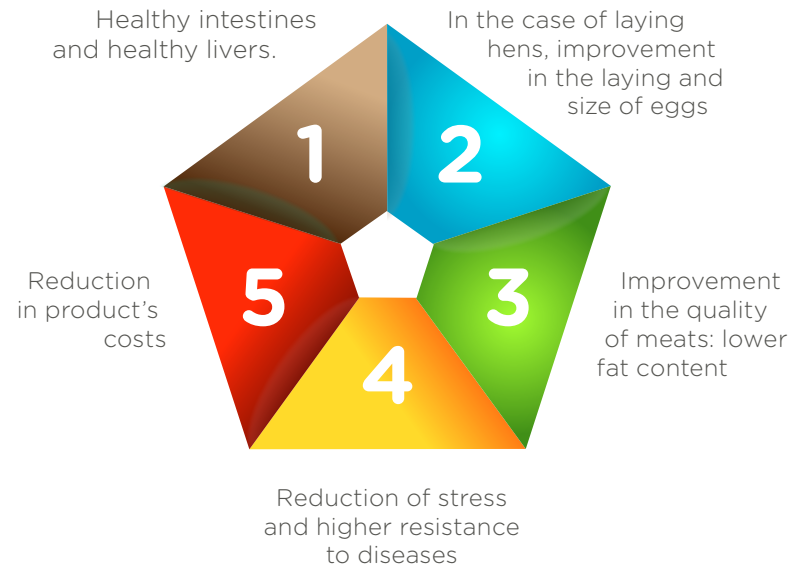

**Olimet 50 Plus** can be directly added to the mixer in balanced feed plants. By means of aspersion, in a slow but constant way, during the 20% of the initial time of mixing.

**Olimet 50 Plus** has proved to be an effective source of methionine activity at 50%, without eliminating appetite, as when adding DL-Methionine at 100%.

# 4 What is crucial of this supplement?

Methionine resources can be very different. By adding or replacing 50 % of OM50P, uniform results were achieved: among the other components of feed, it works as a highly efficient emulsifier.

# 5 Which are the results?

## CONCLUSIONS

Olimet 50 Plus optimizes costs by helping reduce the values of feed ingredients, without deteriorating animals' performance.

Olimet 50 Plus enables to achieve a more flexible formulation while diets are optimized and costs and yields are improved. Thus, producers obtain a maximum return of investment.
